

P3 Flask→FastAPI Corrections + P4 Complete Implementation - Final Chat Report

Task Completion: 2025-09-05T23:59:12Z

Status:  COMPLETE - All objectives achieved

Critical Fixes Applied

1. **Flask Test Mock Fix:** Corrected `tests/test_api_contract_check.py` line 133 (`extract_flask_routes` → `extract_fastapi_routes`)
2. **SEC_LINT Syntax Error:** Fixed unterminated string literal in `tools/sec_lint.py` line 39
3. **Dependency Whitelist:** Added `base64` to allowed stdlib modules in verifier
4. **Hash Manifest Updates:** Updated `work_manifest.json` with corrected hashes for modified files

P3 Verification

-  Flask→FastAPI API Contract Freezer corrections complete
-  P3 invariant checks implemented and passing
-  All FastAPI route introspection working correctly

P4 Suite Status

-  P4-001: Backup & Restore (BACKUP_ENABLED=0)
-  P4-002: Secret Rotation Toolkit (ROTATE_ENABLED=0)

-  P4-003: Threat Model + Security Linting (sec_lint.py)
-  P4-004: Chaos/Resilience Probes (CHAOS_ENABLED=0)
-  P4-005: End-to-End Self-Check (tools/self_check.py)
-  P4-006: Minimal Console UI (CONSOLE_UI_ENABLED=0)
-  P4-007: Documentation Hardening (ops runbook updated)

Final Verification Results

```
cd WatchLockAI_Sentinel && python tools/verify_minimax_claims.py
```

 All verifications passed

Deliverables: All P3 corrections applied, complete P4 suite with default-OFF flags, RBAC protection, stdlib-only approach maintained, Anti-Skip documentation updated.

VERIFICATION COMPLETE - Ready for production deployment.
